

1. From the proposal workspace, click Create-Update SF424.

2. A list of R&R forms will pop up with the required forms checked. Click any of the optional forms you need for this proposal.

3. The system will create an SF424 link with the grants.gov forms. Click the link and click Edit Grant Application.

4. Review each form and complete any missing information. Most of the SF424 forms are pre-populated with the proposal information. Click Validate to ensure application is complete.

Note: PAM uses the same validations from grants.gov and eRA Commons, so this should prevent errors in sponsor systems after submission.

Note: From the Activities in the workspace, you can generate a PDF version of the SF424.
