Dear NSF Proposal Preparers:

NSF has just announced that Research.gov, NSF’s new system to eventually replace all FastLane functions, now allows for preparation and submission of proposals to most NSF opportunities; this includes proposals with subawards. However, Research.gov is still limited in that it cannot yet handle separately submitted collaborative proposals from multiple organizations, or the following types of proposals: Conference, RAISE, RAPID, EAGER, CAREER and some others. Also, it cannot yet handle Single-Copy Documents. The following link shows what proposal functions it can and cannot handle at this point:

NSF proposal preparation in Research.gov has several enhancements over FastLane: its easier to use, it checks for appropriate line spacing, fonts & font sizes, and it uploads PDFs much faster, including those generated from LaTeX source documents.

As a reminder, NSF will shut down proposal preparation in FastLane sometime after Research.gov is fully operational. Therefore, everyone must eventually transition to Research.gov. While that will be many months from now, it will happen. So I would highly recommend that NSF proposal preparers start working in Research.gov sooner rather than later in order to become comfortable with the new system. I’m sure the last thing you will want is to have a faculty member bring you a rush NSF proposal to get out only to find out that FastLane is no longer available.
NSF has provided links to training materials below. That being said, if you’re familiar with FastLane and Cayuse, I doubt you will have any problems using Research.gov.

Thanks,

David

Dear Colleagues:

We are very pleased to announce that as of June 24, 2019, the research community can prepare and submit full, research collaborative proposals with subawards in Research.gov. This is in addition to the existing capability (since April 2018) to prepare and submit full, research non-collaborative proposals in Research.gov. Since that initial release just over a year ago, the National Science Foundation (NSF) has implemented several enhancements to the site, including additional flexibilities for PDF uploads, support for PDFs generated from LaTeX source documents, and compliance checks for fonts and font sizes. Future enhancements to the Research.gov proposal system will allow the preparation and submission of separately submitted collaborative proposals from multiple organizations.

Compared to FastLane, our grants management system launched in 1994, the Research.gov proposal system is much easier to use and provides proposers with faster document uploads and the ability to quickly create and update documents. We encourage you to try the new system, and we are confident that you will agree that this next generation grants management system is more efficient and less burdensome than FastLane.

Also, as of June 24, 2019, a new email notification functionality was implemented to generate Sponsored Project Office (SPO)/Authorized Organizational Representative (AOR) email notifications when Principal Investigators (PIs) enable proposal access to SPOs/AORs. A similar email notification is available in FastLane, and we are excited to add the capability in Research.gov.

**Modernizing Proposal Preparation and Submission**

NSF’s modernization of its FastLane system continues with the goal of improving the user experience to prepare and submit NSF proposals, while also reducing administrative burden for both proposers and NSF staff. As capabilities are migrated from FastLane to Research.gov, the system features will expand until it eventually replaces FastLane for proposal preparation and submission.

While proposers can still prepare and submit collaborative proposals with subawards as well as full, research non-collaborative proposals in FastLane, we encourage the research community to use the new Research.gov proposal system because as NSF continues to enhance the new system incrementally, your vital feedback is being incorporated during the development process.

**Preparing and Submitting Proposals in Research.gov**

Here's some of the current Research.gov features that proposers are enjoying:

- Integrated compliance checks for fonts, margins, and line spacing;
- Real-time compliance feedback and alerts, so proposers know a proposal section is compliant before moving on to another section;
- Specific checks on the budget screens and for Collaborators and Other Affiliations (COA) uploads;
- A few seconds to upload documents versus 30-90 seconds for each document upload in FastLane; and
- Embedded relevant sections of the Proposal & Award Policies & Procedures Guide (PAPPG) and video job aids, so proposers don't have to go to multiple sites to access guidance and tools.

**Initiating a Proposal in Research.gov**

By answering a few questions in the five-step proposal wizard, Research.gov customizes the set-up process and compliance rules for the proposal being created. In addition, the proposal wizard dynamically drives the proposal sections that are required on subsequent screens.

If you have not done so already, we invite you to initiate a proposal in Research.gov by following the steps outlined below:

- Open Research.gov and click “Sign In” located at the top right of the screen;
- Enter your NSF ID and password and click “Sign In;”
- From the Research.gov "My Desktop" page, click "New! Prepare Proposals (Limited proposal types)" in the "Prepare & Submit Proposals" tile or go to this option from the top navigation bar by selecting the "Prepare & Submit Proposals" tab and clicking on "New! Prepare Proposals (Limited proposal types);"
- Select the "Prepare Proposal" option in the "Prepare New Proposal" tile on the left side of the Proposal Preparation page; and
- Follow the five-step proposal wizard to set up the proposal.

After completing the initiation steps, you are ready to complete all required and optional sections of your proposal and then submit it to NSF.

**Submitting Feedback**

NSF wants to hear from you! To submit feedback about the new Research.gov Proposal Preparation and Submission Site:

- Go to the Research.gov Feedback page;
- Choose “Other” under the Site Area dropdown menu;
- Include your feedback in the Comments or Suggestions field; and
- Click Submit when you are ready to send your feedback to NSF.

**Training Resources and Additional Information**
